

we did chapter

Media speed 17 sep

What should

- Media piece
- Spray fell
- 3 reasons why it strong

Math

what is pos?

- ask question
- 1 hour long review
- 2% attach to it
- get help heart help
- 1-1 tutoring
- when

How many hours for devote for hw?
diff for a student

UCI as many hours as pos to get A

Hw part of Sec 1.1-1.3, 1.5

Quiz 1 next Wednesday covering Sec 1.1-1.3/5

1 you can find the zero or x intercept

- go into calc
- select the 2 optio

Give prefer to set notation

Ex: $y = x^2 - 1$
 $D: (-\infty, \infty)$
 $R: [-1, \infty)$

this
will
be included
in the quiz

Domain

(Case 1) Polynomial: $(-\infty, \infty)$
 Ex $5x^3 - 2x + 1$

(Case 2) Rational function
 $f(x) = \frac{\boxed{}}{\boxed{}}$

$\neq 0$ and
solve

locate the points on
a number line
find domain

Suppose $f(x) = \frac{-5x}{3x+2} \quad \begin{array}{l} 3x+2 \neq 0 \\ x \neq -\frac{2}{3} \end{array}$

$-\frac{2}{3}$ is ~~x~~ domain

$D: (-\infty, -\frac{2}{3}) \cup (-\frac{2}{3}, \infty)$

even

(Case 3) $f(x) = \sqrt{\boxed{}}$ $\boxed{} \geq 0$
 solve

Use a number line find the domain

$f(x) = \sqrt{3x+5} \quad \begin{array}{l} 3x+5 \geq 0 \\ x \geq -\frac{5}{3} \end{array}$

$$D: \left[-\frac{5}{3}, \infty\right)$$

Case 4: $f(x) = \frac{\quad}{\sqrt{\quad}}$

$\square > 0$ solve
used a number line
to find D

Ex $f(x) = \frac{-2x}{\sqrt{-2x-6}}$

$$\begin{aligned} -2x - 6 &> 0 \\ -2x &> 6 \\ x &< -3 \end{aligned} \quad \leftarrow \text{number line} \rightarrow$$

$$D: (-\infty, -3) \quad \square$$

find the domain 17, 18, 21

Ex $-2x^3 + \frac{1}{3}x - 5$

Range $(-\infty, +\infty)$

Domain $(-\infty, +\infty)$

17 $f(x) = -1 + \sqrt{x+2}$

$$x+2 \geq 0$$

$$x \geq -2$$

$$[-2, +\infty)$$

$$19 \quad g(x) = \frac{3}{x-4}$$

$$x-4 \neq 0$$

$$x \neq 4$$

$$(-\infty, 4) \cup (4, +\infty)$$

$$21 \quad g(x) = \sqrt{\frac{7}{x-5}} = \frac{\sqrt{7}}{\sqrt{x-5}}$$

$$x-5 > 0$$

$$x > 5$$

you should show
graph
you should show
this

$$(5, +\infty)$$

1.2 Basic Classes of Functions

deriving
formula

$$m = \frac{y_2 - y_1}{x_2 - x_1} \rightarrow m(x_2 - x_1) = y_2 - y_1$$

Descending line slope :-

Horiz. $y = b$
 $m = 0$

Why

Vertical line

$m = \text{DNE}$

DOES NOT Exist

Determined
slope of tangent line

AUR of change is the estimate of the slope of a tangent line

1.3 Trig

Under the Trig relation for next week quiz

$$\text{R.H.P. } \sin^2 + \cos^2 = 1$$

$$\frac{\sin^2}{\sin^2} + \frac{\cos^2}{\sin^2} = \frac{1}{\sin^2}$$
$$1 + \tan^2 = \csc^2 \quad (\text{cosecant})$$

$$\frac{\sin^2}{\cos^2} + \frac{\cos^2}{\cos^2} = \frac{1}{\cos^2}$$
$$\tan^2 + 1 = \sec^2 \quad (\text{secant})$$

$$\text{Ex: Simplify } (\csc \theta) (\sec \theta) (\tan \theta) (\cos \theta)$$

change anything in terms of sine & cosine

$$\frac{1}{\sin \theta} \cdot \frac{1}{\cos \theta} \cdot \frac{\sin \theta}{\cos \theta} \cdot \cos \theta$$

$$= \frac{1}{\cos \theta} = \sec \theta$$

I_{max} F_{max}
 I_{switch} D V R
 Switch other relief

Horizontal line test

tell us draw a hor line to relation, inverse
 is func or X. If it one-one or X

1.5 Exponential and Logarithmic Function

y
 Exponential growth
 Bacterial growth
 Exponential decay

$$y = (5)^x$$

$$y = \left(\frac{1}{3}\right)^x$$

Rationalizing the denominator $\rightarrow \frac{x}{\sqrt{y}} = \frac{x}{\sqrt{y}} \cdot \frac{\sqrt{y}}{\sqrt{y}} = \frac{x\sqrt{y}}{y}$

Example rewrite in exponential form

$$\sqrt[3]{8x^5} = \sqrt[3]{8} \cdot \sqrt[3]{x^5} \\ = 2x^{5/3}$$

Review properties of exponent and other

$$\log_{\text{base}} \text{base} = 0 \Rightarrow \forall b^0 = 1$$

base Exponent

Natural log $\log_e x = \ln x$ have a base of e

$e \approx \pi$ a irrational num. Important Constant

Ex: $\ln e^H = H$

Ex: $e^{5x+1} = 5x+1$

The reason why e are π , large numbers
came it to complex $x \cdot \log$ function x
write all digits

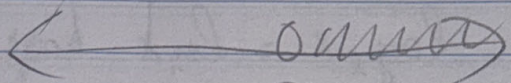

Ex: pH in chem (\log in pH) power
of concentration

- If a pH value is \log , Mag 3 ≈ 3.8
is much, $10^3 < 10^{3.8}$ (big (M))
 \Rightarrow make easier

Domain of $\log \square$ or $\ln \square$ is, first
way of determining, type $0 \Rightarrow$ Error
type $-5 \Rightarrow$ Error
 $\log - \sqrt{0} \Rightarrow$ DNE

$\square > 0$ and solve
used a number line using
domain

Ex: $f(x) = \ln(x-2)$
 $x-2 > 0$
 $x > 2$

2 $D: (2, \infty)$
